

FLY - 3000

There are many times when we come across venues where the ceiling is too high to hang a projection screen.

The Remaco FLY-3000 is designed to solve such issues. With a maximum travel distance of 6.5m, the FLY-3000 can lower a projection screen (for example, the Remaco TEN series or PRO-L series motorized screen) from a high ceiling to its operational height.

The FLY-3000 uses a hidden tubular motor and operates like a motorized screen. When not in use, it can be retracted neatly into its black casing. Control cables for the screen will be kept in the self-coiling drum provided, eliminating unsightly dangling cables.

ACCESSORIES

AVA-200+
Touch-Contact Up/
Down Switch

MPC-852 Motor/Power Controller
with Radio Frequency Receiver

SPECIFICATIONS	
Dimension:	30cm x 27cm x 27cm
Weight:	95kg
Maximum load:	100kg to 160kg (depending on models)
Maximum Travel distance:	6500mm
